

# SCF Renewable Energy Seminar

Saturday 2nd July 2011

11am to 3.30pm

## Action is needed now!

Producing your own electricity and using it or selling it makes good financial sense. This seminar is intended to encourage crofters to have a go at saving and generating electricity by using currently available renewable energy technology.

Presentations will be given by speakers who have installed their own energy efficiency systems, solar panels, hydro and wind generators. There will also be advice about funding the cost of a renewable scheme without grants or borrowing.

Scottish Crofting Federation

rooted in our communities

Rooted in our communities, the Scottish Crofting Federation (SCF) is the only member-led organisation dedicated to promoting crofting and is the largest association of small-scale food producers in the UK.
